

Payroll Interfaces

At Allocate we are committed to delivering benefits to your organisation by integrating to solutions in your environment. Our dedicated Development Team are constantly developing new integrations for leading software vendors. Allocate's workforce solution has been designed as a component in a complete end-to-end IT solution. Our solution provides comprehensive interfacing capabilities with other software packages, in particular when interfacing with Payroll/ Human Resources (HR) and patient allocation systems.

Key Benefits

- Provides an interface to your payroll system
- Improves payroll accuracy
- Reduces time spent manually entering data from HRIS and Payroll solutions
- Elimination of double entries
- Elimination of manual timesheets replaced by
- Electronic Timesheets into payroll
- Facilitates advanced reporting through integration with Business Intelligence tools
- Facilitates a single source of truth between solutions in your environment
- Cost savings through the reduction of data entry errors

Payroll Interfaces Background

Our workforce solution's architecture allows for interfaces with many software systems, encompassing HR, payroll and clinical information. These include large enterprise systems like SAP™, Peoplesoft™ and Oracle™ to integration with solutions such as Chris21™, Aurion™ and Preceda™. Allocate's goal has been to create seamless integration with these products to allow clients to benefit from unified, "best of breed" system solutions. To achieve this, our solution has been developed with an open architecture to facilitate the easy movement of data between these systems.

The result of these integration initiatives has seen organisations achieve enormous efficiencies through these interfaces. Our development team continues to nurture existing interfaces as well as develop new ones as the need for these arise. With a track record of providing successful system integration solutions, we continue to support clients with their system interface needs. In addition to our ability to interface with HRIS and Payroll systems, our system provides a fully integrated solution to Time and Attendance devices (T&A).

Capabilities

Allocate's workforce solution can be included as a component in a complete end-to-end IT solution. As such the system provides comprehensive interfacing capabilities with other software packages, in particular when interfacing with Payroll/Human Resources (HR) packages and patient allocation systems. Attributes are set within Allocate's workforce solution to store Payroll / HR references for each of the records and when communicating with other applications, our solution can reference data held within these external systems by using these reference fields.

Allocate Software has developed close working associations and interfaces with the following HRIS and clinical solutions:

Aurion	Chris 21
Datacom	HR3
IBA	Micropay Meridian
Micropay	Payglobal
Oracle	Preceda
Wage Easy	Supero
SAP	Visipay
Talent2 NPS	

Benefits

The benefits of the Allocate workforce solution's interfacing capabilities include:

- Improves payroll accuracy via payroll interfaces
- Allows for cost savings through the reduction of data entry errors
- Replaces manual timesheets with electronic timesheets
- Reduces time spent manually entering data from HRIS and Payroll solutions
- Facilitates a single source of truth between the different solutions in your environment
- Ensures accurate and reliable time and attendance information via interfaces to biometrics solutions
- Tracks and manages skill and registration expiries received from HRIS and payroll
- Fast transfer of termination dates from payroll into the rostering system
- Displays leave balances in the rostering system
- Provides highly accurate roster costing through the interfacing of pay rates (in combination with the award interpreter)
- Assists the payroll system in managing leave counters
- Enables the utilisation of Allocate's powerful Award Interpretation Engine and sends award interpreted data to payroll
- Ability to populate business intelligence systems with award interpreted workforce data easily and efficiently
- More quickly activating employees to be rostered by interfacing payroll data directly into Allocate's workforce solution
